Experience

Sr. Magento Developer | Logicrays Technology Ahmedabad

July 2022 – Present

- ❖ Worked as senior Magento developer with daily client communication.
- ❖ Supported other team members initiatives by developing solutions to common problems and sharing those solutions
- ❖ Majorly work on customisation product projects.

Projects:

1. Bulk Branding

This project is based on multiple vendor products. Multiple vendors provide different types of APIs, and based on that, they need to create products with custom options. They also need to manage product commissions, etc.

- I created a project from scratch based on client requirements.
- created a module for creating products and options based on API data.
- Category mapping with api data on created products.
- **Challenging task:** Based on Api data, I need to create a product as well as its custom options template for Mageworx template options dynamically, as well as manage tier price and images.

2. Directboot

- M1 to M2 Migration.
- Customize the module to display custom product options and apply fees.
- Create a custom module to apply custom discounts at order and item level in checkout/cart.
- Created a custom module where customers can manage logos and text for embroidery work.
- Customized quotation module for display of customized options and logos

3. CameraWorld

- Magento version upgrade.
- Create a module to trade old and new camera

4. Ruffle Butts

- Work on speed optimization for the site.
- Create and customize third party module
- worked on checkout related changes
- **Challenging task:** i have worked in the search spring module, which is based on JS, so it is challenging work for me.

Magento Developer | Gajera Information and Consultancy Rajkot

March 2022 - July 2022

- ❖ Worked as Magento developer with daily client communication.
- ❖ Handle the full project by me, from git repo management to daily deployment.

Projects:

1. Gemonova

- It's developed in Magento 2.3.5-p1
- Developed various module like, custom coupon, Redeem etc.
- Maintain git repo, daily deployment, bug fixing.

Junior Magento Developer : Cybercom Creation Ahmedabad

Jan 2020 – March 2022

- ❖ Join as PHP developer and after complete the training I have worked in magento 1.9 version
- ❖ Maintain git repo, daily deployment, bug fixing.
- ❖ Complete the task assigned by team leader in order of priority.

Projects:

1. 1Stopbedrooms

This is an online Furniture e-commerce website based in the United States. Where you can personalise and buy furniture to your specifications.

- Created a module for order communication via XML file for a vendor.
- Optimize server cron jobs to reduce execution time.
- Challenging task: Created a custom module for Backorder dates, custom modules for generating refund reports salesman-wise.
